

De Klerck Engineering – BIM-MEP Modeler

About the role:

As a **BIM-MEP Modeler**, you are responsible for modeling and coordinating technical installations within the BIM process. You work closely with engineers and project managers to ensure that our designs meet the highest quality standards and are efficiently integrated into the construction process.

- You develop and manage BIM models of special techniques (HVAC, electricity, stability) in a BIM model for a varied range of projects, from office and residential buildings to educational institutions, public facilities, and healthcare projects.
- You work out these installations in close collaboration with our designers.
- You take responsibility for the development of your own models and their coordination with other techniques and the architectural model.
- You identify bottlenecks and proactively contribute to finding solutions.
- You support the implementation of BIM processes and standards within our company.

What do you bring to the table?

- Minimum a bachelor's degree in a technical field (construction, electricity, electromechanics) or equivalent through experience.
- Experience with BIM software such as Revit, AutoCAD MEP, or similar tools.
- Strong communication skills and a team-oriented attitude.
- Problem-solving ability and attention to detail.
- Willingness to learn and continuously develop yourself within the rapidly evolving BIM environment.

What do we offer you?

- A warm welcome in our family business, where you will quickly feel at home in a driven, fun, and enthusiastic team focused on a sustainable future.
- A mentor will guide you in the first weeks and months, so you quickly become familiar with all formal and informal aspects.
- Broad autonomy and responsibility for your own projects.
- Various development opportunities and training, both internally in our own SDK Academy and externally.
- Comfortable working conditions with quality IT and office equipment, a competitive salary package with additional benefits such as meal vouchers and a cafeteria plan.
- Great career advancement opportunities in a rapidly growing environment.
