

De Klerck Engineering – Project Engineer HVAC Copy

About the role:

As a Senior Project Engineer HVAC, you are responsible for designing heating, ventilation, and sanitary installations for medium to large projects, with a focus on the healthcare sector such as nursing and care homes. You work closely with project managers to deliver high-quality, sustainable solutions. Furthermore, you are a mentor to your colleagues and enjoy passing on your knowledge and experience to others. You also train new colleagues.

What will you be doing?

- We want to attract conceptual thinkers and doers who design HVAC systems for our diverse and challenging projects.
- You are driven to discover the most innovative techniques.
- You will have the ability to determine which installations and concepts will be applied in the buildings of tomorrow. You will do this in close consultation with your fellow engineers, BIM modellers, and the client.
- Meanwhile, sustainable building and rational energy consumption will receive your utmost attention.
- You will document your concept and design in a specification, a bill of quantities, and a 3D BIM model of the technical installation.
- You take responsibility for the complete design of the technical installation. At the start of the implementation, you ensure the technical follow-up, both on-site and in the role of project manager's assistant.

What do you bring to the table?

- You have built up a minimum of 3 to 5 years of relevant experience.
- The pursuit of sustainable and future-proof solutions energizes you, and you enjoy being challenged.
- You are already applying the techniques of tomorrow today and are curious about those of the day after tomorrow.
- You work in an organized and precise manner, with a strong focus on results.
- Customer orientation comes naturally to you; you gladly support both colleagues and external clients.
- You are driven to further develop your talents and grow in your role.
- Communication is one of your strong points, and you take responsibility for your tasks.
- You are open to new methods and actively seek opportunities to improve existing procedures.

What's in it for you?

- A warm welcome in our family business, where you will quickly feel at home in a driven, fun, and enthusiastic team focused on a sustainable future
- Responsibility to help set the lines towards the future, your valuable input is appreciated.

- Ample autonomy and the opportunity to take on responsibilities
- Various development opportunities and training, both internally in our own SDK Academy and externally
- Comfortable working conditions, a competitive salary package with additional benefits such as meal vouchers and a cafeteria plan
- Great career advancement opportunities

But since a job description never tells all, let us hear from you soon so we can schedule an introductory meeting!
